

Dear Parent or Guardian,

Did you know that summer learning loss impacts students and teachers every year? Summer learning loss occurs naturally when students experience a break in education. As summertime quickly approaches, we are committed as ever to your student's education. We want to be sure your student comes back to school next fall as confident and ready as possible for their continued success, and we need your help.

What we know is when students practice skills over summer break, summer learning loss is greatly reduced and skills are retained. Conversely, repeated years of summer learning loss in elementary school negatively impact a student's achievement in high school. Like you, we want your student to have the most successful educational career possible. We have arranged to pass on our special school-only pricing to parents to purchase a Summer Learning workbook for just \$12.00 (retail price \$14.95 plus tax). The activities are specifically designed to bridge the period between grade levels, using daily activities and exercises, and including a comprehensive summer reading list.

I am asking you to:

- Order books for your students using the attached form.
- Encourage your child to work in their book for 30 minutes every day
- Assure that your child has 5-10 books at their reading level
- Ask your child about the work they are doing and the books they are reading
- Praise your child for their work

We are taking orders now for these specially priced *Summer Bridge Activities* books. Order forms are attached. Make checks payable to Crown Pointe Academy. All books will be sent home the last week of school.

Sincerely,

Keith Ouweneel
