Parent and student(s) acknowledge that the care of this unit is a joint responsibility. Families have identified a need for the use of borrowing computer hardware from the school at this time. The use of the Chromebook is designated for educational use only. No additional software will be installed, browser extensions, wiping of the machine, or physically altering the hardware or software will occur. The functionality of the machine is not guaranteed, and repairs will not be performed at this time. Replacement machines will not be issued if there is an issue with the machine. If the item is lost, stolen or damaged, both parent and student are liable for replacement costs and repair costs which may impact fees and fines being added to student accounts; full replacement or full damage replacement fees are agreed to at a rate of \$200 per machine. If at any time the unit is not functioning properly, it is agreed that you will promptly notify Evan Sherlock via email at evan.sherlock@crownpointeacademy.org. It is furthermore agreed that you will return the unit and charging cord in the same condition to the school as soon as requested so that it can be returned for in class learning.

Parents/Guardians of students have already signed a technology agreement at the beginning of the school year outlining best practices and guidelines with regard to student accounts. All guidelines of student accounts are applicable for use of hardware and account at home and out of the building. Please note, as a school, we cannot guarantee student protection as many of our solutions do not work outside our facility. Guardians will monitor students while they are using the device--this means monitoring of web usage and websites visited as well as the wellbeing of the device itself. The device is restricted to use with domain accounts only and has further web and extensions restrictions in place. You will be using your own WIFI to conduct online learning, so this is up to the family to provide and make connectivity reliable. Printing from the Chromebook will be difficult if not impossible. Students will still have to log in with their Crown Pointe Google Account login to access online learning. With that being said, Crown Pointe Academy reserves the right to pull student login and browser history if concerns arise or if anything outside of classroom learning and educational activities are pursued or if accounts are being misused.
